Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: (A) the species wherein the surface is provided on a reflection-type optical element (claims 1-6 and 14-17), and (B) the species wherein the surface is provided on a transmission-type optical element (claims 7-12 and 18-23).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

If species (A) is elected the following elections of sub-species is required:

(A1i) the sub-species wherein the film having the structure specified in claim 3, and

(A1ii) the sub-species wherein the film having the structure specified in claim 5.

Additionally, election of one of the following sub-species is required:

(A2i) the sub-species wherein the optical surface is provided on a polygon mirror (claim 15),

(A2ii) the sub-species wherein the optical surface is provided on a mirror located between the light source and the deflector (claim 16), and

(A2iii) the sub-species wherein the optical surface is provided on an imaging mirror (claim 17).

If species (B) is elected the following elections of sub-species is required:

(Bi) the sub-species wherein the optical surface is provided on an imaging lens (claim 19),

(Bii) the sub-species wherein the optical surface is provided on a glass window (claim 20),

(Biii) the sub-species wherein the optical surface is provided on a collimator lens (claim 21), and

(Biv) the sub-species wherein the optical surface is provided on a cylindrical lens (claim 22).

Claim 13 will be examined along with either species (A) or (B), if elected.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
